Available for full-remote work, hybrid work in Rome and business travel

PROFILE

Java Tech Lead and analyst with 20+ years of IT consulting for banks, insurers and the public sector. Since 2019 I have been working on GIANOS®, the anti-money laundering platform by Cedacri (ION Group) used by Italian banks and insurers: estimates, analysis, development, migrations and technology upgrades, coordinating developers and testers. I combine solid Java/Spring skills with AML domain knowledge and close collaboration with clients.

WHAT I BRING

- **Anti-money laundering domain:** hands-on knowledge, from analysis to release, of an AML platform used by Italian banks and insurers.
- **Evolving critical systems:** migrations and technology upgrades on regulated applications, ensuring service continuity.
- **Team leadership:** coordinating developers and testers, estimates, release planning and technical hiring.
- **System integration:** web services and data exchange across organizations (ANIA, ACI, INPS, corporate SOAP/REST services).
- **End-to-end lifecycle:** from requirements with the client to design, development and production release.

KEY SKILLS

Domain	Anti-money laundering (AML) and banking compliance · Insurance (claims, P&C and Life policies) · Public sector
Leadership	Technical leadership of developers and testers · Estimates and planning · Technical interviews · Client relations · Training
Back-end	Java / J2EE, Spring Boot, Spring, Hibernate / JPA, JDBC Template, REST, SOAP (JAX-WS, Axis2), JSF, Struts
Data	Oracle, PL/SQL, DB2, SQL Server, MySQL, MongoDB (basic)
Platforms	JBoss EAP, WebSphere, WebLogic, Tomcat · Docker, Maven, Jenkins, IBM RTC, Postman
Generative AI	Claude and Claude Code (Anthropic) for analysis, documentation and assisted development, with human review
Web	JavaScript, jQuery, HTML/CSS, Bootstrap, Liferay (basic)
Methods	Agile, Unified Process, UML, object-oriented analysis and design
